

ANANYA TADEPALLI

ananyasai.github.io/portfolio/ | (470) 991-9100 | atadepalli789@gmail.com | linkedin.com/in/ananya-tadepalli

EDUCATION

Stanford University

Bachelor of Science in Computer Science, Artificial Intelligence Concentration

Stanford, CA

Expected June 2028

Minor: Physics

Relevant Courses: Python • Java • C++ • Linear Algebra • Differential Equations • Multivariable Calculus • Applied Combinatorics • Quantum Computing

Activities: Stanford Quantum Computing Association Projects and Hackathon Coordinator • Stanford ACM MLab Project

Innovation Academy

Alpharetta, GA

High School Diploma- Cybersecurity Concentration, Summa Cum Laude | GPA: 4.0/4.0

May 2025

Relevant Courses: Advanced Cybersecurity • Calculus • Physics: Mechanics, Electricity & Magnetism • Python • Java

Honors / Awards: National Cyber Scholar • CyberStart America Gold Award • NCWIT Aspirations in Computing – National Honorable Mention and Georgia Affiliate Winner • IBM Quantum Challenge • Congressional Gold Award

SKILLS & CERTIFICATIONS

- **Programming Languages:** Python • Java • C++ • HTML • JavaScript • CSS
- **Tools & Technologies:** Web Design • AWS • Docker • GCP • Git • TensorFlow • Excel
- **Certifications:** CompTIA Security+ Certification (Issued June 2024) • IBM Basics of Quantum Information Badge (Issued July 2025) • MIT Beaver Works Summer Institute Quantum Software Certificate (Issued August 2024)
- **Programs & Honors:** NSA GenCyber Program • Georgia Governor's Honors Program – Computer Science

RELEVANT EXPERIENCE

Stanford University – Böttcher Group, Department of Applied Physics

Stanford, CA

Research Assistant

October 2025 – Current

- Investigating quantum phase transitions and vortices in two-dimensional Josephson junction lattices to determine the system's global phase by cooling the array using thermalization techniques and measuring properties like resistance and magnetism

The Cyber Security Forum Initiative

Remote

Cyber Threat Intelligence Intern

September 2025 – Current

- Conducting open-source intelligence (OSINT) gathering to detect and monitor emerging cyber threats and profile threat actors
- Applying industry-standard frameworks such as MITRE ATT&CK and MITRE D3FEND to map common adversary tactics
- Compiling actionable intelligence reports that detail proactive defense strategies and presenting evidence to stakeholders

Georgia Tech Cyber Forensics & Innovation Laboratory

Atlanta, GA

Research Assistant

August 2023 – August 2025

- Assisted PhD research focused on automating the collection of fraud campaign evidence in blockchain transactions through the use of smart contract forensics and advanced data analysis techniques to uncover patterns in detailed attack information
- Used symbolic execution and reverse engineering techniques to trace large-scale attacks through their malicious contracts

Quantum Computing Research

Remote

Independent Research

September 2022 – July 2025

- Studied the impact of Quantum-Safe Cryptography (QSC) on website response under varying network conditions and published research paper in Springer Lecture Notes in Networks and Systems [CompCom 2025, Volume 3, LNNS 1425](#)
- Presented at international computing conferences including the PEARC 2024- 1st Workshop on Broadly Accessible Quantum Computing, 11th annual Women in Cybersecurity Conference, 13th Computing Conference 2025, and Quantum Tech 2024

Cyber Defense Initiative

Alpharetta, GA

Founder & President

August 2022 – Current

- Leading a 50-member non-profit organization focused on increasing cybersecurity awareness in the community through lectures at local libraries, frequent blogs, personal cybersecurity tools, and outreach initiatives at local schools ranging K-12
- Built Personal Cyber Risk Assessment Tool ([P-CRAT](#)) and Windows Tool for Exploit Reporting ([Win-TER](#)) for community use

Fulton County Cybersecurity Task Force

Alpharetta, GA

Student Ambassador

April 2023 – May 2025

- Worked with cyber professionals across the county and district CIO to combat threats and propose cyber awareness policies
- Authored children's storybook *Cyberville Chronicles* and distributed the book to school libraries and teachers across the county

Leverage Global Consulting

Remote

AI Software Engineering Intern

May 2023 – August 2024

- Developed AI/ML model to classify 1M+ healthcare records using Python and TensorFlow and presented to product manager
- Leveraged ML and Laravel Framework to create an interactive site-access log analytics module to highlight security threats
